

2025 Week of	first date	3/24	3/31	4/7	4/14	4/21	4/28	5/5	5/12	5/19	5/26	6/2	6/9	6/16	6/23	6/30	7/7	7/14	7/21	7/28	8/4	8/11	8/18	8/25	9/1	9/8	9/15	9/22
Cercospora Leaf Spot disease on beets	5/6							2019			2024	2020	2021	2022		2025		2023										
Imported cabbageworm eggs	5/6							2024																				
Aphids	5/8							21/23	2025	20/24	2022			2019														
Spittlebugs	5/8							2023	22/24/2	2019		2020																
Diamond back moth caterpillar	5/13							24/25																				
Imported Cabbageworm (larvae)	5/13							2024	20/22																			
Colorado Potato Beetle adults	5/14							20/21/22/23	2024	2019	2025																	
Three Lined Potato Beetles (adult and eggs)	5/15							23/25	21/2/4		19/22																	
Rhubarb disease, Ramularia rhei	5/15							2025	21/23/24																			
Earwigs	5/15							2022		23/24	21/25																	
Four Lined Plant Bug adult	5/15							2022	2024					20/23														
Harlequin Bugs	5/17							2022	2025									2024	2023									
Sod Webworm	5/18							2020																				
Leafhoppers	5/19								2025																			
Cucumber Beetles, striped	5/19								2025		20/21/22	23/24				2019												
Rhubarb Curlicio	5/22																											
Sunscald on strawberries	5/22								2024																			
Sunscald on beans plants	5/22								2024																			
Sunscald on tomato plants	5/22								2024																			
Slugs	5/23								2021	2023	2024	2025																
Grey Mold disease in strawberries	5/24								2025		20/21																	
White Rot disease in garlic	5/25								2024			21/22	2020	2023														
Tomato disease, Early Blight / Septoria	5/27									2024	19/20/22/25	2021		2023														
Cross Striped Cabbageworm (eggs)	5/27								2024		20/21/22		2025						2023									
Strawberry leaf spot disease	5/27									2019	2020		2022		2025													
Pepper disease, Bacterial Leaf Spot	5/29										2022	21/23	19/20/25															
Basil Downy Mildew disease	5/30										22/25	2024			2021		19/23					2020						
Mexican Bean Beetles adults	5/31										24/25			2021		20/22			2023									
Whitefly nymphs	6/1										2024																	
Orange Rust Disease on raspberry plant	6/5											2023	2025															
Allium Leaf Miner damage	6/5											2023																
Wireworms	6/5											2020																
Hail storm damage	6/5											2020																
Colorado Potato Beetle larvae	6/8											2020	2023															
Cucumber plant disease, Angular Leaf Spot	6/10												21/23	19/22/24	20/25													
Cross Striped Cabbageworm (larvae)	6/10												20/21/22		2025					2023								
Squash Bug adults (no eggs)	6/10												2021															
Cucumber Beetles, spotted	6/10												2024						2021			2023						
Brittle root disease of horseradish	6/10												2020															
Ramularia on Lovage	6/13												2022															
Japanese Beetles	6/14												2021	2024	20/22/2	2023												
Colorado Potato Beetle larvae	6/16													2025														

2025 Week of	first seen	first date	3/24	3/31	4/7	4/14	4/21	4/28	5/5	5/12	5/19	5/26	6/2	6/9	6/16	6/23	6/30	7/7	7/14	7/21	7/28	8/4	8/11	8/18	8/25	9/1	9/8	9/15	9/22	
Squash Vine Borer adults	616	6/16													24/25	22/23		2021												
Powdery Mildew	617	6/17													2019	2025		22/24	2021	2023			2020							
Pigweed Flea Beetle	617	6/17													2024	2022		23/25		2019										
Bean plant disease, Bacterial Brown Spot	617	6/17													2019															
Sunflower plant disease, Bacterial Leaf Spot	617	6/17													2019															
Brown Marmorated Stinkbug (adult /larvae)	617	6/17													2024							2021		2022						
Botrytis disease in garlic	619	6/19													2020															
Leaf Hoppers on potato plants	619	6/19													2024				2022											
Squash Bug adults & eggs	621	6/21													2023	20/21/22/24/25		2019												
Squash Vine Borer eggs	622	6/22													2024		2022	2023												
Bacterial Wilt Disease on cucumber plants	624	6/24														20/22/25	2024	2023	2021				2019							
Sunscauld on pepper fruit	630	6/30															21/25			2022	2020			2019						
Asiatic Garden Beetles	630	6/30															2024				2021									
Sunscauld on raspberries	701	7/1															22/24		2019						2020					
Cabbage looper caterpillar	701	7/1															2024	2022												
Mites on pepper plants	702	7/2																2024						2019						
Tomato cracking	705	7/5																2021		20/25			2019		2023					
Squash Bug nymphs	706	7/6															2020													
Raspberry cane borer	706	7/6															2020													
Celery Anthracnose disease	707	7/7																21/25		2022		2024								
Tomato catfacing	711	7/11																	2022	2024	2025	2020				2023				
Squash Vine Borers frass	711	7/11																21/22	19/20/23											
Anthracoise on cucumber plants	714	7/14																	2025											
Plectosporium Blight on pumpkin and zucchini plants	714	7/14																	2025						2023					
Onion maggots in leek plants	715	7/15																	2024											
Lace bug on quince tree	715	7/15																	2024											
Spider mites on bean plants	715	7/15																		24/25		2022								
Hornworm	717	7/17																	2020	2024	19/25									
Eggplant lacebug	717	7/17																	2023			24/25			19/22					
Blossom End Rot in Tomatoes	717	7/17																	2020											
Cercospora Leaf Spot disease on swiss chard	719	7/19																	2023	2022					2020	2021				
Bean Leaf Beetle	720	7/20																	2020											
Blister Beetles	720	7/20																	2021											
Bean Mosaic Virus disease	720	7/20																			2024				2021					
Downy Mildew disease on cucumber plants	722	7/22																	2025	21/22	2024		2023							
Corn leaf aphid	723	7/23																		2024										
Citrus platid planthopper	723	7/23																		2024										
Mexican Bean Beetles larvae	724	7/24																		2025										
Anthracoise fruit rot disease on tomatoes	724	7/24																		22/25	2020			2019	2023					
Bean Yellow Mosaic Virus	726	7/26																		2025		2023								
Carrot Weevil	728	7/28																				2023								

2025 Week of	first seen	first date	3/24	3/31	4/7	4/14	4/21	4/28	5/5	5/12	5/19	5/26	6/2	6/9	6/16	6/23	6/30	7/7	7/14	7/21	7/28	8/4	8/11	8/18	8/25	9/1	9/8	9/15	9/22
Mexican Bean Beetles pupae	731	7/31																			2025								
Golden Tortoise Beetle	731	7/31																			2023								
Sunscauld on tomato fruit	801	8/1																			2020								
Blackberry Psylid	801	8/1																			2022								
Tomato Fruitworm , AKA Corn Earworm	802	8/2																			2025				2022				
Sap Beetles on corm	803	8/3																			2022								
Peach Brown Rot	808	8/8																				2023							
Sunflower Seed Maggot	811	8/11																					2025						
Citrus Flatid Planthopper	811	8/11																					2025						
Tarnished Plant bug	811	8/11																					24/25						
Potato Scab	811	8/11																					2025						
Saddleback caterpillar	811	8/11																					2025	2021					
Hawthorn lacebug	814	8/14																					2025						
Corn Smut	819	8/19																							2022				
Milkweed bugs	826	8/26																							2019				
Distorted carrots	826	8/26																							2021				2020
Anthracoise fruit rot disease on peppers	829	8/29																							2023	2022			
Marginal Leafburn on blueberry plants	829	8/29																							2022				
Anthracoise on Currants	911	9/11																										2023	
Grasshoppers	912	9/12																										2022	
Spotted Lanternfly	912	9/12																										2020	
Mold on zucchini (Choanephora cucurbitarum)	912	9/12																										2022	2023
Cercospora disease of malabar spinach	912	9/12																										2022	
Powdery Mildew disease on pumpkin	912	9/12																										2020	
Raspberry Leaf Spot disease	912	9/12																										2020	
Yellow Jackets on raspberries	913	9/13																										2020	
Downy Mildew disease on watermelon plants	914	9/14																										2022	

The following table contains the key sightings data for each problem seen including:

- The name of the problem
- The type of problem including insect+, disease and abiotic. The “insect+” type includes insects and arthropods.
- The date first seen between 2018 and 2025.

PROBLEM	TYPE	DATE FIRST SEEN
Whiteflies	insect+	overwinter
Imported Cabbageworm (adults)	insect+	March 29
White grubs	insect+	March 31
Cutworms	insect+	April 6
Allium Leaf Miners	insect+	April 10
Cold damage to plants	abiotic	April 12
Leaf Miner eggs	insect+	April 17
Flea Beetles	insect+	April 19
Asparagus Beetles	insect+	April 24
Standing water	abiotic	April 29
Spotted Lanternfly nymphs	insect+	May 1
Leaf Miners	insect+	May 3
Cold damage to strawberry blossoms	abiotic	May 3
Four Lined Plant Bug nymph	insect+	May 4
Sow Bugs and Pill Bugs	insect+	May 5
Three Lined Potato Beetles (adult and eggs)	insect+	May 5
Imported Cabbageworm (eggs)	insect+	May 6
Cercospora Leaf Spot disease on beets	disease	May 6
Imported cabbageworm eggs	insect+	May 6
Aphids	insect+	May 8
Spittlebugs	insect+	May 8
Diamond back moth caterpillar	insect+	May 13
Imported Cabbageworm (larvae)	insect+	May 13
Colorado Potato Beetle adults	insect+	May 14

PROBLEM	TYPE	DATE FIRST SEEN
Rhubarb disease, Ramularia rhei	disease	May 15
Earwigs	insect+	May 15
Four Lined Plant Bug adult	insect+	May 15
Harlequin Bugs	insect+	May 17
Sod Webworm	insect+	May 18
Leafhoppers	insect+	May 19
Cucumber Beetles, striped	insect+	May 19
Rhubarb Curlicio	insect+	May 22
Sunscald on strawberries	abiotic	May 22
Sunscald on beans plants	abiotic	May 22
Sunscald on tomato plants	abiotic	May 22
Slugs	insect+	May 23
Grey Mold disease in strawberries	disease	May 24
White Rot disease in garlic	disease	May 25
Tomato disease, Early Blight / Septoria	disease	May 27
Cross Striped Cabbageworm (eggs)	insect+	May 27
Strawberry leaf spot disease	disease	May 27
Pepper disease, Bacterial Leaf Spot	disease	May 29
Basil Downy Mildew disease	disease	May 30
Mexican Bean Beetles adults	insect+	May 31
Whitefly nymphs	insect+	June 1
Orange Rust Disease on raspberry plant	disease	June 5
Allium Leaf Miner damage	insect+	June 5
Wireworms	insect+	June 5
Hail storm damage	abiotic	June 5
Colorado Potato Beetle larvae	insect+	June 8
Cucumber plant disease, Angular Leaf Spot	disease	June 10
Cross Striped Cabbageworm (larvae)	insect+	June 10
Squash Bug adults (no eggs)	insect+	June 10
Cucumber Beetles, spotted	insect+	June 10
Brittle root disease of horseradish	disease	June 10
Ramularia on Lovage	disease	June 13

PROBLEM	TYPE	DATE FIRST SEEN
Japanese Beetles	insect+	June 14
Colorado Potato Beetle larvae	insect+	June 16
Squash Vine Borer adults	insect+	June 16
Powdery Mildew	disease	June 17
Pigweed Flea Beetle	insect+	June 17
Bean plant disease, Bacterial Brown Spot	disease	June 17
Sunflower plant disease, Bacterial Leaf Spot	disease	June 17
Brown Marmorated Stinkbug (adult /larvae)	insect+	June 17
Botrytis disease in garlic	disease	June 19
Leaf Hoppers on potato plants	insect+	June 19
Squash Bug adults & eggs	insect+	June 21
Squash Vine Borer eggs	insect+	June 22
Bacterial Wilt Disease on cucumber plants	disease	June 24
Sunscald on pepper fruit	abiotic	June 30
Asiatic Garden Beetles	insect+	June 30
Sunscald on raspberries	abiotic	July 1
Cabbage looper caterpillar	insect+	July 1
Mites on pepper plants	insect+	July 2
Tomato cracking	abiotic	July 5
Squash Bug nymphs	insect+	July 6
Raspberry cane borer	insect+	July 6
Celery Anthracnose disease	disease	July 7
Tomato catfacing	abiotic	July 11
Squash Vine Borers frass	insect+	July 11
Anthracnose on cucumber plants	disease	July 14
Plectosporium Blight on pumpkin and zucchini plants	disease	July 14
Onion maggots in leek plants	insect+	July 15
Lace bug on quince tree	insect+	July 15
Spider mites on bean plants	insect+	July 15
Hornworm	insect+	July 17
Eggplant lacebug	insect+	July 17

PROBLEM	TYPE	DATE FIRST SEEN
Blossom End Rot in Tomatoes	disease	July 17
Cercospora Leaf Spot disease on swiss chard	disease	July 19
Bean Leaf Beetle	insect+	July 20
Blister Beetles	insect+	July 20
Bean Mosaic Virus disease	disease	July 20
Downy Mildew disease on cucumber plants	disease	July 22
Corn leaf aphid	insect+	July 23
Citrus platid planthopper	insect+	July 23
Mexican Bean Beetles larvae	insect+	July 24
Anthrachnose fruit rot disease on tomatoes	disease	July 24
Bean Yellow Mosaic Virus	disease	July 26
Carrot Weevil	insect+	July 24
Mexican Bean Beetles pupae	insect+	July 31
Golden Tortoise Beetle	insect+	July 31
Sunscald on tomato fruit	abiotic	August 1
Blackberry Psylid	insect+	August 1
Tomato Fruitworm , AKA Corn Earworm	insect+	August 2
Sap Beetles on corm	insect+	August 3
Peach Brown Rot	disease	August 8
Sunflower Seed Maggot	insect+	August 11
Citrus Flatid Planthopper	insect+	August 11
Tarnished Plant bug	insect+	August 11
Potato Scab	disease	August 11
Saddleback caterpillar	insect+	August 11
Hawthorn lacebug	insect+	August 14
Corn Smut	disease	August 19
Milkweed bugs	insect+	August 26
Distorted carrots	abiotic	August 26
Anthrachnose fruit rot disease on peppers	disease	August 29
Marginal Leafburn on blueberry plants	abiotic	August 239
Anthrachnose on Currants	disease	September 11
Grasshoppers	insect+	September 12

PROBLEM	TYPE	DATE FIRST SEEN
Spotted Lanternfly	insect+	September 12
Mold on zucchini (<i>Choanephora cucurbitarum</i>)	disease	September 12
Cercospora disease of malabar spinach	disease	September 12
Powdery Mildew disease on pumpkin	disease	September 12
Raspberry Leaf Spot disease	disease	September 24
Yellow Jackets on raspberries	insect+	September 13
Downy Mildew disease on watermelon plants	disease	September 14
